SmartSolar Charge Controllers 250V and 99% efficiency MPPT 250/60, 250/70, 250/85 & 250/100

Ultra-fast Maximum Power Point Tracking (MPPT)

Especially in case of a clouded sky, when light intensity is changing continuously, an ultra-fast MPPT controller will improve energy harvest by up to 30% compared to PWM charge controllers and by up to 10% compared to slower MPPT controllers.

Advanced Maximum Power Point Detection in case of partial shading conditions

If partial shading occurs, two or more maximum power points may be present on the power-voltage curve.

Conventional MPPTs tend to lock to a local MPP, which may not be the optimum MPP.

The innovative SmartSolar algorithm will always maximize energy harvest by locking to the optimum MPP.

Outstanding conversion efficiency

No cooling fan. Maximum efficiency exceeds 99%.

Flexible charge algorithm

Fully programmable charge algorithm (see the software page on our website), and eight pre-programmed algorithms, selectable with a rotary switch (see manual for details).

Extensive electronic protection

Over-temperature protection and power derating when temperature is hiah.

PV short circuit and PV reverse polarity protection. PV reverse current protection.

Internal temperature sensor

Compensates absorption and float charge voltage for temperature.

SmartSolar Charge Controller MPPT 250/100-Tr with optional pluggable display

SmartSolar Charge Controller MPPT 250/100-MC4 without display

Bluetooth Smart built-in: dongle not needed

The wireless solution to set-up, monitor and update the controller using Apple and Android smartphones, tablets or other devices.

VE.Direct

For a wired data connection to a Color Control GX, other GX products, PC or other devices

Remote on-off

To connect for example to a VE.BUS BMS. **Programmable relay**

Can be programmed (a.o. with a smartphone) to trip on an alarm, or other events.

Optional: pluggable LCD display

Remove the seal that protects the plug on the front of the controller, and plug-in the display.

Temperature compensation -16 mV / -32 mV / -64 mV / °C		
Protection Battery reverse polarity (fuse, not user accessible) PV reverse polarity / Output short circuit / Over temperature		
Operating temperature -30 to +60°C (full rated output up to 40°C)		
Humidity 95%, non-condensing		
Data communication port VE.Direct or Bluetooth		
Remote on/off Yes (2 pole connector)		
Programmable relay DPST AC rating: 240VAC / 4A DC rating: 4A up to 35VDC, 1A up to 60VDC		
Parallel operation Yes (not synchronized)		
ENCLOSURE		
Colour Blue (RAL 5012)		
35 mm² / AWG2 (Tr models) PV terminals 3) Two sets of MC4 connectors (MC4 models 250/60 and 250/70) Three sets of MC4 connectors (MC4 models 250/85 and 250/100)		
Battery terminals 35 mm ² / AWG2		
Protection category IP43 (electronic components), IP22 (connection area)		
Weight 3 kg 4,5 kg		
Dimensions (h x w x d) in mm Tr models: 185 x 250 x 95 Tr models: 216 x 295 x 103 MC4 models: 215 x 250 x 95 MC4 models: 246 x 295 x 103	-	
STANDARDS		
Safety EN/IEC 62109-1, UL 1741, CSA C22.2		

1a) If more PV power is connected, the controller will limit input power to the stated maximum.

1b) The PV voltage must exceed Vbat + 5V for the controller to start. Thereafter the minimum PV voltage is Vbat + 1V.

A PV array with a higher short circuit current may damage the controller.
MC4 models: several splitter pairs may be needed to parallel the strings of solar panels.

Maximum current per MC4 connector: 30A (the MC4 connectors are parallel con ected to one MPPT tracker)
